## **Welcome to Endodontic Care Center (ECC)**

Endodontics, aka, “root canal treatment,” is one of the dental specialties recognized by the American Dental Association. “Endo” meaning “inside” and “dodontics” meaning “tooth.”

At Endodontic Care Center (ECC), our doctors perform ALL of our procedures using the microscope and use it during the ENTIRE length of the procedure. This is a unique aspect of our office. Our experience performing microscope-enhanced endodontic treatment is second to none in the local area.

We focus on dentin conservation and take extra measures to minimize structural damage in order to preserve the structural integrity of a tooth.

Our doctors at ECC are dedicated Restorative Dentists. We have strict comprehensive protocols for Adhesion Dentistry. We strive to fortify and reinforce teeth for better functional strength, actually making them stronger.

You have been referred to ECC because your dentist has decided that your tooth needs special care. By referring you to get specialty care, your dentist is showing a personal concern for the quality of your dental care. At ECC, our goal is to provide you with excellent state-of-the-art endodontic care, but we also strive to make the “root canal” experience as pleasant as possible. After all, “care” is our middle name.

Please visit us at [www.rootcanals.net](http://www.rootcanals.net) for more information about our office. We look forward to meeting you and caring for your endodontic needs.

## **Mobile phone navigation:**

**Please enter “Berkeley” with the address.** Otherwise, GoogleMaps, Waze, or Apple Maps will navigate you to Oakland.

**Navigate to Whole Foods, Berkeley, on Ashby and Telegraph.** We are across the street.

## **Parking**

Please DO NOT park in the Whole Foods Parking Lot. You will be cited.

There are pay parking lots nearby (see map above).

There are plenty of 2 hour metered spots. Some of them use the Park Mobile app, so that you can add minutes from afar.
